Radiance - A Web Framework Environment for Common Lisp

Usual Framework Focus

- Single application
- Tightly integrated
- Convenience through large toolsets

Usual Framework Focus

- Single application
- Tightly integrated
- Convenience through large toolsets
- Often force libraries on you

Usual Framework Focus

- Single application
- Tightly integrated
- Convenience through large toolsets
- Often force libraries on you
- Problematic to host multiple applications

Radiance's Goals

- Many applications simultaneously
- Shared resources
- Exchangeable parts
- Only use what you want

Radiance's Goals

- Many applications simultaneously
- Shared resources
- Exchangeable parts
- Only use what you want
- Fully specified

A Tiny Example

- option: Pizza votes: 32
- option: Pasta votes: 4
- option: Lasagna votes: 12
- option: Crêpes votes: 9
- option: Mashed Potatoes votes: 2

Submit

```
(in-package #:rad-user)
(db:create 'vote '((option (:varchar 32))
                   (votes :integer)))

(define-page display #@"/" ()
  (r-forms:choose
    #@"/api/vote" "id"
    (dm:get 'vote (db:query :all))))

(define-api vote (id) ()
  (with-model-save model ('vote (:= '_id id))
    (votes)
    (incf votes))
  (redirect #@"/")
  (api-output "Vote registered."))
```

```
(define-interface (database db)
  (defun create (collection structure
                 &key indices if-exists))
  (defmacro query (query-form))
  ...))

(define-interface (data-model dm)
  (defun get (collection query
              &key (skip 0) (amount 0) sort))
  ...))
```

```
(define-module #:my-database
  (:use #:cl)
  (:implements #:database))
(in-package #:my-database)
```

```
(defun db:create (database db
                  &key indices if-exists)
  ...)
```

```
(defmacro db:query (query-form)
  ...)
```

```
...
```

Ramblings about stag beetles and lisp

A Not So Brief Update - Confession 50

2015.02.22

It's been a while since I've made a blog about my personal life, even though I recall promising that I would. So, I suppose it can't hurt to quickly summarise what's been going on, and what will most likely be going on in the near future.

Using CL+Qt - Confession 49

2015.02.12

Some deem it unfortunate, others are not bothered by it at all, but the fact remains that Common Lisp does not have a standard GUI toolkit. It does have a native toolkit called [McCLIM](#), but due to general outdated-ness it is not a very attractive choice. Generally I'm not one to linger long on decisions when it comes to learning something, so after quickly evaluating the options I chose to try [CommonQt](#), a library to allow using the [Qt](#) framework with CL.

Memoirs of a Lost Girl - Entry No. 7

2015.02.09

It has been a long time since I've had the chance to write an entry. A lot has happened – too much to think about, let alone put it into words. Many a thing that I've experienced is still strange and foreign to me, as if from a bad dream.

Running Tests in CL - Confession 48

220px-A Canticle For Le... This is book thread. Tell us why we should bother reading the book you post.

A Canticle for Leibowitz is the most significant sci-fi I have read. It explores the world after a nuclear holocaust and traces its build up similar to the Roman empire, with a monastery named after a man who was burned for trying to protect the knowledge of the old world, Leibowitz. This book reads easily with the exception of the really odd Jewish reflection near the middle that doesn't seem to tie into anything. A must read for... anyone.
